

Westman Communications Group Provides Wireless High Speed Internet Solution to Keystone Centre

Brandon MB, April 27, 2010 - Westman Communications Group (Westman), a service provider of advanced voice, video and data solutions announced today the provision of wireless services throughout the Keystone Centre leveraging their advanced fiber optic network.

The introduction of wireless Internet services to the facility will allow Keystone customers access to high speed Internet anywhere in the complex. This improved service capability will serve a broader customer base, enabling the Keystone to generate additional revenue. Westman is pleased to be able to provide this state of the art service to the Keystone Centre.

Dave Baxter, President and CEO, Westman Communications Group, notes, "We're very proud to provide the latest technology and our expertise to this local facility. Guests of the Keystone Centre will experience the most advanced wireless system available when they interact with the Internet." Baxter added, "We look forward to working with the Keystone to continue to provide new and improved services to the facility.

Dan Robertson, General Manager, Keystone Centre, says "We are very pleased with our partnership with Westman and this expansion further demonstrates Westman's support of community based organizations such as the Keystone Centre." "Our clients have been asking for a wireless Internet service in the facility for years. This new system will allow us to meet the demand and will create a positive revenue stream for the facility," indicated Robertson.

Customers utilizing the new service will find it very easy to use. They will be provided with a security code by Keystone Centre sales staff and as soon as they arrive at the facility they will have Internet access on their laptops.
